

March 7, 2025

Dear Valued Customers,

We are reaching out to you in preparation for the Drug Supply Chain Security Act (DSCSA) Track and Trace requirements that will be enforced by the FDA as of [November 27, 2024](#). Methapharm is committed to ensuring a smooth transition towards the effective sharing of serial numbers associated with all shipments of prescription drugs to our customers located within the United States.

For those customers for whom we do not have an EPCIS connection, serialized sales shipment data will be available through the TraceLink portal starting September 1, 2024. To access the serialized data for any products that are subject to the DSCSA reporting requirements, please log into <https://opus.tracelink.com/>. Once logged in, select “TraceLink Network Applications—Product Information Manager.” To retrieve the EPCIS file, select “MAH” as the “Transfer From Business” and populate the delivery number (found on the packing list received with your product shipment) in both the “Delivery Number” and “Access Code” fields. If you do not already have access to TraceLink, please email verification@tracelink.com prior to November 2024 to set up your account in order to gain access. There is no charge for setting up an account, or for accessing the serialization information for your delivery.

If you would like to establish an EPCIS connection to receive this data automatically, please reach out to dscsasupport@methapharm.com for further information.

Sincerely,

Methapharm, Inc.

Boca Raton, FL 33433
