

Urology Consumables

These disposables provide high-quality, cost-efficient solutions to help ensure fluid management in the imaging suite

Fluidrain LSS Container (Liquid Solidifications System)

The Fluidrain LSS container facilitates the swift and convenient collection of fluids for disposal in situations where a floor drain is either unavailable or prohibited.

Uro Drain Extension Tubing

When used in conjunction with the uro drain bag, the extension tubing increases the length of the uro drain bag tube by approximately 6 feet (182.9 cm), resulting in a total combined length of approximately 12 feet (365.8 cm).

Uro Drain Y-Connector

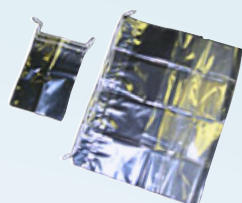

The uro drain Y-connector enables the attachment of multiple Fluidrain LSS containers, accommodating procedures that require handling high fluid volumes.

Uro Drain Bag

The uro drain bag is a disposable liner designed for the uro drain frame. Its expandable tubing can stretch up to approximately 6 feet (182.9 cm) in length. The bag is available in both sterile and non-sterile packaging options.

Universal Foot Switch Cover

Single-use equipment covers serving as effective bacterial and contagion barriers for foot switches
Latex Free
Melting Point: 210°F
